

Lesson 15: Cover Work

A.C. NORMAN
Bishop Heber High School

December 3, 2010

This lesson I shall be away – see you on Monday! In my absence, I should like you to work from this sheet.

My life as a snowflake

EITHER

Write a story in the front of your book and illustrate it with pictures,

OR

Draw out a story board or cartoon strip,
to describe your life as a snowflake. You will have to use your imagination
and what you have learnt about solids, liquids and gases in lessons.

- where did you come from?
- what happened to you after you fell to earth?
- what changes occurred?

You might like to include some or all of the following words in your story:

condensing, solid, vapour, liquid,
ice, gas, water, melting,
contracting, freezing, expanding,
cold, stream, puddle, river,
hot, ocean, evaporating

If you finish all of the work on this sheet, you may work quietly on your studies in other subjects.
