

Which skateboard surface has the best grip?

Very smooth – polished

Smooth – Bare wood

Rough – Sandpaper

TASK

A group of skateboarders wanted to know which skateboard surface has the best grip.

In your plan include:

- Equipment list
- Variables – the ones you will keep the same (control) the one you will change (independent) and the one you will measure (dependent)
- A description of what you will do
- Include a suitable range and intervals for your observations
- Safety precautions

Collecting results:

- Draw a table for your results
- Collect sufficient results

Use the Information Sheet to help you.

Key words

control variable, dependent variable, independent variable, intervals,
range, variable
