### **Energy resource sales pitch**

Your task today is to choose an energy resource to invest in. You will hear presentations on each energy resource from business people developing the technology, who all need your money as an investment!

You need to consider the advantages and disadvantages of each resource, by preparing 3-5 questions to ask each team. You must ask the same questions to each team. They have been briefed to include in their presentations:

**Pollution** – will any waste be produced?

**Efficiency** – how much energy can be produced?

**Cost** – how much will the energy cost?

**Difficulty** – how hard to build?

**Renewable** – is it sustainable?

**Reliability** – is energy produced all the time?

You need to decide what you are looking for as an investor in an energy resource. What is important to you? Cost? Pollution? Sustainability?

Come up with a list of things you are looking for:

Now come up with 3-5 questions to ask each team.

1.

2.

3.

4.

5.
