

Heating my home

A.C. NORMAN

anorman@bishopheber.cheshire.sch.uk

A rough guide as to how the marks are given is as follows:

		Effort Grade		Achievement of task
A	Excellent	this effort grade will rarely be given – to get this mark the work must demonstrate great effort and real clarity	+	Excellent understanding of the work
B	Good	will be given e.g. when a lot of effort has obviously been put into the work or when the work is very clearly set out	=	Good understanding of the work
C	Average	will be given for work which is of a satisfactory, acceptable standard; if you get less than C you must improve the standard at once!	–	Poor understanding of the work
D	Poor			
E	Very Poor			

1. What is the main fuel that is used to provide the heat energy in your home?
2. What temperature is the thermostat set to in your home?
3. What kinds of insulation are there in your house to reduce heat loss? List as many as you can (look at the examples we wrote down in class).
4. Does your home have an energy performance certificate (EPC)? If so, what rating has it (this will be a letter from A–G, e.g. Bishop Heber High School has a ‘C’ rating?)
